

I am writing to ask that the federal regulations regarding WI "no call rule" NOT be changed to allow for more non-restrictive use of telemarketing calls. In this day of extended technology, "existing" customers are capable of contacting businesses they deal with on their own and do not have to have telemarketers providing that service. These calls are an unwanted imposition into the daily lives of WI citizens. The quality of life for WI families is far too important to have our days interrupted with these unwanted calls.
